

Innovative GRP tank claddings for maximum strength, corrosion protection and lightweight design – Booth K39

LAMILUX at Intermodal Europe 2025 – High-Performance Composite Materials for Tank Containers and Transport Solutions

At Intermodal Europe 2025 in Barcelona, LAMILUX Composites will present its latest fibre-reinforced high-performance materials for tank containers, refrigerated vehicles and intermodal transport applications. Visitors can find LAMILUX from 21–23 October 2025 at Booth K39 at the Fira Barcelona Gran Via exhibition centre.

Trade Fair Focus: Logistics, Cold Chain and Container Solutions

Intermodal Europe is Europe's leading trade fair for container transport, intermodal logistics and cold chain technology.

It unites the sectors of sea, rail and road transport, container technology, digitalisation and sustainability.

In 2025, the fair celebrates its 50th anniversary under the motto "Agility, Reliability & Responsibility", bringing together over 130 exhibitors, 50 conference sessions and 4,500 participants from more than 90 countries.

Product Highlight: GRP Tank Claddings for the Highest Demands

In Barcelona, LAMILUX will showcase state-of-the-art glass fibre-reinforced composite materials for tank containers, setting new benchmarks in stability, weight reduction and corrosion resistance.

These innovative LAMILUX products combine maximum strength, low weight and long-term resistance to weather, chemicals and mechanical stress – making them ideal for modern tank container cladding.

Technical Advantages at a Glance

- Maximum strength with minimum weight: twice the strength of steel.
- Up to three times stronger than conventional tank cladding materials.
- Low specific weight: increased payload and improved energy efficiency.
- Excellent corrosion resistance: ideal performance under humidity, chemicals and temperature fluctuations.
- Outstanding impact resistance: withstands shocks and mechanical pressure.
- Easy-to-clean, smooth surfaces: no rust formation, effortless cleaning and maintenance.

Live at Booth K39: At the booth, LAMILUX will present:

- Material samples in various surface finishes and colours
- Comparison specimens between metal and GRP cladding
- Expert consulting on tank container, refrigeration and logistics applications

About Intermodal Europe

Intermodal Europe is the leading international platform for the container and logistics industry, bringing together decision-makers and manufacturers from over 90 countries each year – and for the first time in 2025, hosted in Barcelona. The event focuses on innovation in intermodal transport, digitalisation and sustainable supply chain solutions.

About LAMILUX Composites GmbH

For around 70 years, LAMILUX Composites GmbH has been producing fibre-reinforced plastics. As a medium-sized company, we are Europe's leading manufacturer, with state-of-the-art continuous production processes, large manufacturing capacities, and an extensive product range. LAMILUX supplies customers worldwide in various industries, including construction, automotive and recreational vehicle manufacturing, cold storage, and many other sectors.
